

## 'GOING-ON' @ GYVLON

MAY 2010

### COMING SOON to a television near you !

Gyvlon will be appearing in a one hour makeover 'special' episode of **DIY SOS**

The programme was filmed during May in Brynawr, Gwent and the 'makeover' was for a family of mum, dad, and 3 children whose housing conditions were deemed 'unfit' for the children to live in which meant they were living further up the road with their Grandmother.

In order to reunite this family Lafarge Gyvlon, Lafarge Readymix and our approved Gyvlon Screeder supplied their materials and expertise free of charge.

The ground floor consisted of hallway and 2 reception rooms which had differing levels, plus a new extension at yet *another* level. The time constraints and limited depth available meant that only a calcium sulphate screed would be suitable.

The fact that this project was for a TV programme created difficulties with the projects building programme, the project needed to fit in with filming schedules and the fact that Gyvlon could be force dried enabling the timber and tiled flooring to be laid was key to the project.

Using both floating and unbonded construction the desired level was achieved throughout the ground floor.

Watch this space for the actual 'appearance' date !
