

## 'GOING-ON' @ GYVLON

SEPTEMBER 2010

### RIBA Approved CPD Presentations

Many of you are still not aware that RIBA Approved CPD Presentations are available from Lafarge Gyvlon.

Historically screeds have changed very little; as such specifications have remained very similar and don't always contribute as much as they could to the building, in addition screeds can be thought of as a problematic product due to curling and cracking.

Thanks to advances in technology from Lafarge Gyvlon, screeds and in turn their specification and contribution towards building design have changed, allowing designers to choose screeds that eliminate the traditional problems and also contribute towards the floor performance and help reduce landfill.

Lafarge Gyvlon is the UK's and Europe's largest producer of Flowing screeds making us the "First Choice in Green Screed Technology". Last year we reduced landfill in the UK by over 50,000 tonnes thanks to our projects. We also offer a free Specification/Technical Service that includes U-value Calculations, Acoustic Data and NBS specification.

We offer **two** RIBA Approved CPD Seminars that are eligible for *Double Points*:

- "Innovations in Anhydrite Screeds Technology",
- "Acoustic Presentation"

For more information on GYVLON visit our website

[www.gyvlon.co.uk](http://www.gyvlon.co.uk)

"Innovations in Anhydrite Screeds Technology", includes: -

- **Floor Screeds Generally:**  
*Uses/Issues/Problem Solving Specification*
- **How production affects Landfill & Carbon Footprint**
- **Specification:**  
*Depths/Bay sizes/Joint Details/Acoustic Edge Detail*
- **Construction Solutions:**  
*Improving Part L, Overview in Improving Acoustics, Improving UFH Performance*
- **Benefits**
- **Post Installation Consideration:**  
*How to Improve Drying Times / Eliminate Liquid DPM's, Correct Floor covering prep*
- **Questions**

The "Acoustic Presentation" in conjunction with insulation manufacturers (in addition to a shortened version of the above) covers:

- **Part E for Walls and Floors**
- **Under Screed Acoustic Solutions**
- **Timber and Concrete Floor Design**
- **Sustainable Product Manufacture**
- **How to Achieve 4 Credits under the Code for Sustainable Homes**

Both presentations last just under an hour and are best presented over a lunch hour; both presentations are **completely free of charge** and include lunch for all attendees.

To discuss dates and times for either presentation please contact the Warrington office who will put you in touch with the relevant area Technical & Specification Manager.

**UNIT 221 EUROPA BOULEVARD, WESTBROOK, WARRINGTON WA5 7TN**
